

Cased Coil Cabinet Change

eTPB2220 | May 25, 2022

IMPORTANT DATES

First Order:

As inventory is depleted by model

First Ship:

As inventory is depleted by model

Pricing Info:

No changes

Ratings:

No changes

As we continue our efforts toward improved coil quality, manufacturing capacity and availability, our facility in Trenton, NJ has invested in a new wrapper line. This wrapper line builds the cabinets that house the coil itself, and the current line is over 25 years old. In addition to a 33% boost in line efficiency, the cabinet design itself is more durable and has been optimized for easier coil access. Exhibit 1 below shows the difference between the current (old) and new designs.

To track this, there will be a 14th digit model number change from "A" to "B" on all Trenton manufactured 4TXC and 4PXC coils. Table 1 on page 2 shows this change, but rest assured, there is no change to pricing or ratings and our Order Management teams will transition models on your behalf as we deplete current inventory of the old cabinet design.

We are on track for the first production volumes to be coming off the line on May 23, 2022 and are excited about the benefits this new wrapper line and cabinet design will bring for years to come.
